First up, create your fundraising page with Enthuse, our official fundraising partner.</p>
WEEK 2	<p>Fuelling your body</p> <p>Here are our top three foods to help aid your recovery and rebuild and repair those muscles after every run:</p> <p>1. Watercress</p> <p>Not just garnish – watercress is an established big-hitter for recovery and damage limitation. The peppery leaves contain hefty amounts of iron, vitamin C and calcium and are a great way to liven up a salad. Eat: Whenever you can</p> <p>2. Alcohol-free beer</p> <p>Contains powerful antioxidant phenols: a German study showed runners who were given non-alcoholic beer for three weeks before the Munich Marathon suffered less inflammation afterwards than a placebo group – and probably fewer headaches too! Drink: Erdinger Alkoholfrei</p> <p>3. Apples</p> <p>Among many good things, apples contain quercetin, an anti-inflammatory antioxidant. Eat: Like they say, an apple a day</p>	<p>Session 1</p> <p>10 min walk; 2 min easy run, 1 min walk x 10; 5 min easy run; 5 min run (50 min total)</p>	<p>Listen</p> <p>The Run Wave</p> <p>A safe place for runners to discuss what's on their mind, vent about things going on within the running community, and just a place where runners can be themselves and have a great time.</p>	<p>Session 2</p> <p>10 min easy walk; 1 min steady run, 2 min walk x 6; 5 min easy walk (33 min total)</p>	<p>London's best running routes</p> <p>The Big Half is a celebration of our capital – if you live in the city and want to get to know it better while training, take a look at Lonely Planet's seven best running routes for inspiration.</p>	<p>Session 3</p> <p>5 min walk; 20 min easy run; 3 min walk; 20 min easy run; 5 min walk (53 min total)</p>	<p>Involve colleagues.</p> <p>Add your fundraising link to your email signature, or put it on the work noticeboard, to spread the word with your colleagues.</p>

WEEK 7	<p>How to deal with injury</p> <p>1. It's OK to be upset or angry about not being able to run. Let those initial emotions out, don't bottle them up or they will build.</p> <p>2. You can't run right now, but that doesn't mean you're not an athlete. Use this time to focus on your diet, improve flexibility and work on a better sleep routine.</p> <p>3. Don't rush back. WEEK 9	<p>Understanding tapering</p> <p>It may feel counter-productive, but slowing down, prioritising rest, and reducing your mileage in the last couple of weeks before Event Day is exactly what your body needs to perform at its very best.</p> <p>So trust your training – you won't gain any extra fitness in these last couple of weeks. Rest up and make sure you're itching to go next week.</p>	<p>Session 1</p> <p>30 min easy run</p>	<p>Listen</p> <p>Well Far: the Running Podcast</p> <p>Well Far aims to help you to go the distance – check out the Miles and Your Menstrual Cycle Episode to discover the link between periods and performance.</p>	<p>Session 2</p> <p>40 min steady run</p>	<p>Dose of Society</p> <p>For a fresh perspective on the news, check out @doseofsociety. Tomorrow is a big day – make sure you eat well and get to bed early, so you're ready to take on 13.1 miles!</p>	<p>THE BIG HALF EVENT DAY!</p> <p>The good news? Today is The Big Half Event Day!
